SUMMARY

Software Developer with over 4 years of experience building backend systems in C#/.NET and PHP (Laravel), with fintech experience. Skilled in API development, migrating legacy systems to event-driven architectures, and implementing saga-based workflows with NServiceBus, focusing on reliability and scalability. Experienced with frontend technologies when needed, consistently delivering clean, production-ready code.

Technical Skills

Languages & Frameworks: C#, .NET (Core, 6, 8), ASP.NET Web API, GraphQL (Hot Chocolate), PHP (Laravel), NServiceBus, Quartz.NET, Entity Framework, Dapper

Architecture & Patterns: Event-Driven Architecture, Domain-Driven Design (DDD), Clean Architecture, Microservices

Tools & Platforms: Azure Functions, Docker, Azure DevOps (Repos, CI/CD with YAML), Git, Jira, Confluence, Lucidchart, GitHub Copilot, Sentry, ServiceInsight (NServiceBus Monitoring)

Databases: Microsoft SQL Server, MySQL, SQLite

Testing & Quality: Integration Testing (Testcontainers), MSTest, xUnit, SpecFlow (BDD), NSubstitute

Frontend: Vue 3, TypeScript, JavaScript, Bootstrap, jQuery

PROFESSIONAL EXPERIENCE

Mid .NET Developer

MoneyMe
April 2024-December 2025

- Contributed to the migration from legacy systems to an event-driven microservices architecture, implementing workflows and coordinating module transitions to ensure smooth and reliable processes.
- Created detailed documentation for each module, outlining current implementation, proposed changes, and potential impacts on affected teams to guide planning and ensure smooth migration.
- Participated in code reviews and mentored a junior colleague, promoting best practices and improving team knowledge sharing.
- Automated recurring processes using Quartz.NET to reduce manual work
- Led migration from .NET 6 to .NET 8
- Implemented integration testing using Testcontainers to improve environment consistency
- Built Azure Functions for scheduled and background processing tasks
- Created reusable CI/CD pipelines using Azure DevOps YAML templates

Junior .NET Developer

MoneyMe
March 2023–March 2024

- Developed RESTful and GraphQL APIs optimized for handling large datasets and maintainable code
- Built transaction-related components for a credit platform
- Maintained and improved legacy systems
- Wrote unit tests to improve code quality and reduce regressions
- Optimized SQL queries and stored procedures for better performance

Junior C# and Web Developer

TopLogic Consulting Corporation
July 2022–February 2023

- Developed backend APIs using Clean Architecture principles
- Worked on CMS, wellness, and insurance-related systems
- Improved database performance through query optimization
- Built frontend features using Vue 3 and TypeScript, integrating APIs

Computer Programmer I

DOST – Food and Nutrition Research Institute
March 2020–May 2021

- Developed a data collection system for nationwide nutrition surveys
- Built internal tools to improve workflow and productivity
- Contributed to CMS development for the eNutrition platform

EDUCATION

Bachelor of Science in Information Technology (2018-2019)

Lyceum Of Alabang

Diploma in Information and Communication Technology (2015 – 2018)

Polytechnic University of the Philippines -Taguig Branch
